## PROJECTS

### 'Book Town ' a comprehensive e-commerce website for book purchasing

[Github](#)

- Implemented a user-friendly interface using HTML, CSS, Bootstrap Tailwind and vanilla JavaScript .
- Integrated advanced functionalities including a search feature and robust user account management system.
- Incorporated a seamless order placement and payment integration system for efficient and reliable transactions. Enabled user authentication and authorization to ensure secure access and personalized user experiences.

### E-Commerce Website for Fashion Accessories

[Github](#)

- Developed an e-commerce platform for fashion accessories using HTML, Tailwind CSS, JS, React
- Dynamic data rendering via RESTful APIs for real-time updates.
- Utilized Redux for effective state management, facilitating seamless data and function across components
- Designed a modular and scalable codebase, ensuring easy future updates and feature additions.

### An Exact clone of the Razorpay Official Website UI, built using the HTML & Tailwind CSS.

[Github](#)

- Responsive user interfaces that seamlessly ensure optimal user experience across platforms.
- Proficient in Tailwind CSS for rapid, scalable web application styling, prioritizing code readability and maintainability

## CERTIFICATION

- IBM Data Science Certification – Coursera
- MongoDB complete dev. Guide – Udemey

## EXTRA CURRICULAR

- Participated in Blind Coding Competition and Hackathon on intercollege level
- ACES member
